Most Powerful Environmentally Safe Natural Insect Repellent!

Presenting an eco friendly insect repellent that works! Our new multi-use cedar oil bug spray is the best choice for use as a natural personal skin protectant for yourself and family, as well as, a bug biting barrier for most domesticated pets and horses, too. -

(Boca Raton, FL- January 2020) - Longstanding entrepreneur Paul Einbinder, President of Eco Prefer Solutions announces the company's most effective eco friendly bug spray known as "**Cdar**" Oil.

"Cdar" Oil is a 100% natural, safe and effective insect repellent made from cedarwood oil. **"Cdar" Oil** is your best choice for a powerful eco solution that repels and kills mosquitoes, fleas, ticks, ants, mites, and more.

"We are committed to distributing a product that contributes to making a greener environment. **"Cdar" Oil** is proven to be a healthy insect repellent alternative for use at home, office, travel, camping, etc. I tried many combinations of essential oils and sprays. From trial and error, I discovered that the most effective insect repellent product was natural cedar wood oil extracted from the wood of a cedar tree. **Works just as well or better than the toxic alternatives** out in the market today when used as directed. The success lies in its use." says Paul Einbinder, President.

Please visit www.ecoprefersolutions.com to learn more and place an order. Custom ordering available. For all media outlets, retailers, distributors, mass-market buyers, contact Paul Einbinder directly at ecoprefersolutions@gmail.com or call / text **(786)785-1613**.

Eco Prefer Solutions is committed to donate a portion of its profits from the sale of our eco friendly insect repellent products to non-profit organizations whose mission is to curb diseases transmitted by insects.
